

# PetiK Homepage

(last update : July 9<sup>th</sup> 2002)

EMAIL : [petikvx@aol.com](mailto:petikvx@aol.com)

NEW : [FORUM FOR ALL VXERS : CLICK HERE](#)

[PLEASE SIGN MY GUESTBOOK : CLICK HERE](#)

2002:

July 9<sup>th</sup> :

**GOOD BYE TO ALL VXERS. I LEAVE THE VX-SCENE. I HOPE MY WORKS LIKE YOU AND WILL HELP YOU IN YOUR VX-LIFE.  
IF YOU WANT TO CONTACT ME, PLEASE WRITE IN THE GUESTBOOK.  
Special Thanx to : alc0paul, Benny/29A, Bumblebee, Vecna, Mandragore,  
ZeMacroKiller98 and the greatest coder group : 29A**

July 7<sup>th</sup> : Add some new descriptions of AV (from Trend Micro and McAfee)

July 3<sup>rd</sup> : Add the binary of my last Worm coded with alc0paul : [VB.Brigada.Worm](#)

July 2<sup>nd</sup> : Add a new link : [Second Part To Hell](#)

June 29<sup>th</sup> : Add my new tool : [PetiK's VBS Hex Convert](#) and add my last full spread VBS worm : [VBS.Hatred](#)

June 26<sup>th</sup> : Add [W32/HTML.Dilan](#)

June 24<sup>th</sup> : Add [VBS.Park](#)

June 22<sup>nd</sup> : I finish my new worm : [VB.DocTor.Worm](#)

June 20<sup>th</sup> : [PETIKVX EZINE #2 REALIZED : DOWNLOAD IT](#) and add a new tool : [CryptoText](#) and my last worm : [VB.Mars.Worm](#)

June 19<sup>th</sup> : Add [VBS.Cachemire](#). Add my new article [VBS/HTML Multi-Infection](#).

June 16<sup>th</sup> : I join a new Virus Group : [Brigada Ocho](#) (create by alc0paul)

June 1<sup>st</sup> : Add [VB.Lili.Worm](#). My new worm is released : [I-Worm.Haram](#)

May 31<sup>st</sup> : I leave the [rRlf](#) group

May 23<sup>rd</sup> : New Ezine : [rRlf#2](#)

May 19<sup>th</sup> : I remove some source. You can find of them in [PetiKVX#1](#) and the other in PetiKVX#2. Finish [VB.Visual.Worm](#) published in PetiKVX #2

May 14<sup>th</sup> : Add [W97M.ApiWord](#)

May 12<sup>th</sup> : Add [W32.HLLW.Archiver](#)

May 10<sup>th</sup> : Add a new tool to protect against new VBS Worm. [PPVBSW](#)

May 9<sup>th</sup> : Add a new macro virus : [W97M.AutoSpread](#)

May 8<sup>th</sup> : I join the rRlf group (<http://www.rrlf.de>). Add [HTML.Welcome](#).

May 6<sup>th</sup> : Add a new article : [VBS Tutorial](#) and exist in [PDF](#)

April 27<sup>th</sup> : Add [VBS.Xchange](#)

April 21<sup>st</sup> : Add all source of my works.

April 7<sup>th</sup> : Add my first Ezine : [PetiKVX Ezine #1](#). My new email is [Petikvx@aol.com](mailto:Petikvx@aol.com)

March 15<sup>th</sup> : Add [I-Worm.Together](#)  
March 14<sup>th</sup> : My new email : [petikvx@lycos.fr](mailto:petikvx@lycos.fr) ([petikvx@multimania.com](mailto:petikvx@multimania.com) failed)  
March 10<sup>th</sup> : Add [W32.HLLW.LiteLo](#)  
March 9<sup>th</sup> : Add my articles in PDF format : [articlesPDF](#) and [29A#6](#).  
March 8<sup>th</sup> : Add my first VBS worm and HTML virus generator : [PSWVG](#)  
(W32.PSVG.gen : Norton AntiVirus, Constructor.VBS.PSWVG.10 : AVP)  
March 3<sup>rd</sup> : Add a new virus/worm : [VBS/W97M.Doublet](#)  
February 25<sup>th</sup> : Add a macro virus : [W97M.Wolf](#)  
February 24<sup>th</sup> : Add a lame love worm : [HTML.Linda](#)  
February 22<sup>nd</sup> : Add [W32.HLLW.Wargames](#)  
February 18<sup>th</sup> : Add a new Ezine : [rRI](#)  
February 16<sup>th</sup> : Add my first virus (perhaps bug) : [WinRAR.Linda](#)  
February 14<sup>th</sup> : Add a new HTML virus : [HTML.Macrophage](#)  
February 10<sup>th</sup> : Can download my last worm. Add my second article : [Technics](#)  
February 7<sup>th</sup> : Finish my last worm : [I-Worm.Falken](#) (can't download immediately)  
February 4<sup>th</sup> : Add new worm : [I-Worm.Extract](#)  
February 1<sup>st</sup> : New Worm : [W32/W97M.Twin](#)  
January 27<sup>th</sup> : I come back with a new worm : [HLLW.SingLung.Worm](#)  
January 20<sup>th</sup> : Add [PetiKShow](#). This program contains all the sources of my works.  
January 10<sup>th</sup> : Add an old [article about Worm Spreading](#) written by me on September 19<sup>th</sup>.  
January 1<sup>st</sup> : HAPPY NEW YEAR. I DECIDED TO STOP TO CODE VIRII AND WORM. **GOOD BYE**

2001:

December 10<sup>th</sup> : Add my last worm : [W32.HLLW.Last](#)  
November 6<sup>th</sup> : [I-Worm.Anthrax](#)  
October 12<sup>th</sup> : [I-Worm.WTC](#)  
September 8<sup>th</sup> : [I-Worm.Passion](#)  
September 2<sup>nd</sup> : [I-Worm.Rush](#)  
August 24<sup>th</sup> : [I-Worm.Casper](#)  
August 18<sup>th</sup> : Add the tool tElock 5.1 (A compress/encrypted PE file)  
August 16<sup>th</sup> : [I-Worm.Kevlar](#)  
August 12<sup>th</sup> : New design. You can hear one of my compositions.  
August 9<sup>th</sup> : New description from AVP about [I-Worm.MadCow](#) and [I-Worm.Friends](#).  
August 8<sup>th</sup> : [I-Worm.XFW](#)  
July 18<sup>th</sup> : [New Family](#) : [W32.Pet\\_Tick](#) family (6), [VBS.Pet\\_Tick](#) family (3) from Norton Antivirus  
July 8<sup>th</sup> : [I-Worm.MaLoTeYa](#)  
July 3<sup>rd</sup> : [VBS.Delirious](#)  
June 30<sup>th</sup> : [I-Worm.Bush](#)  
June 19<sup>th</sup> : [I-Worm.Winmine](#)  
June 18<sup>th</sup> : [W97M.Blood](#)  
June 17<sup>th</sup> : [VBS.Seven](#)  
June 10<sup>th</sup> : [VBS.Starmania](#), [I-Worm.Gamma](#), [W97M.Kodak](#)  
June 4<sup>th</sup> : [BAT.Quatuor](#)

June 3rd : [Bastille](#), [JS.Germinal](#)

June 2nd : Add some Worms : [HTML.Embargo](#), [I-Worm.Mustard](#)

May 25th : I start my homepage.

## Source

You can found here my different worms that I create :

Real Name	Date	AntiVirus Name (TM=Trend Micro)	Description
Bastille	06/03/2001	AVP : IRC.Worm.Petik TM : <a href="#">Bat.Petik.A</a>	It's a DOS worm. It uses mIRC to spread. On July 14th, he stops the computer
BAT.Quatuor	06/04/2001	<a href="#">IRC.Becky.A</a>	A BAT file which uses mIRC to spread.
<a href="#">CryptoText</a>	06/20/2002		Coded in VB6. Encrypt ASCII file.
<a href="#">HTML.Bother</a>	05/13/2001	<a href="#">HTML.Bother.3180</a>  AVP : VBS.Both TM : <a href="#">HTML.Bother.A</a>	It is script that uses ActiveX controls to perform actions. It modifies the default home page. It infects to all .HTM and .HTML files that it founds in the \MY DOCUMENTS and \WINDOWS\WEB folders. The default icon for .html files is changed.

HTML.Linda	02/24/2002		Lame love worm.
HTML.Macrophage	02/14/2002	HTML.Prepended Panda : HTML/Mage	Infect htm,html,htt,hta and asp files in different special folders.
<a href="#">HTML.Welcome</a>	05/08/2002	VBS.Manu@mm TM : <a href="#">VBS.PATIK.G</a>	My first virus for rRlf group. Infects web files (htm,html,htt,asp) and spread with Outlook into a VBS file.
<a href="#">I-Worm.Anthrax</a>	11/06/2001	W95.Pet_Tick.gen TM : <a href="#">Worm.Pettick.A</a> Sophos : W32/Petick-A	Open WAB default file to take some email and spread with MAPI. Spread with mIRC too.
<a href="#">I-Worm.Bush</a>	06/30/2001	W95.Pet_Tick.E@mm AVP : I-Worm.Petik.e	Uses MAPI to spread. Not BUGS.
I-Worm.Casper	08/24/2001	TM : <a href="#">Worm.Capser.A</a>	It's a utility which detect Happy99 and Icecubes. Uses MAPI. Perhaps bugz.
I-Worm.Dandelion	11/16/2001		UNRELEASED WORM
I-Worm.Extract	02/04/2002	Panda : <a href="#">W32/Extract</a> TM : <a href="#">WORM.PETIK.L</a>	Open KERNEL32.DLL to find API.
<a href="#">I-Worm.Falken</a>	07/02/2002		First WGAA worm. WARNING !
<a href="#">I-Worm.Friends</a>	05/05/2001	W32.Pet_Tick.B <a href="#">W32.Fiend.Worm</a>	It uses a VBS file and mIRC to spread.

		AVP : <a href="#">I-Worm.Petik.b</a>	he alters the window's owner and company.
<a href="#">I-Worm.Gamma</a>	05/09/2001	w95.Pet_Tick.D@mm w95.Wormfix.Worm@mm  AVP : I-Worm.Petik.c	Scan all *.*htm* file in "Temporary Internet Files" and uses MAPI function to spread
I-Worm.Haram	06/01/2002		Spread with a random VBS file in StartUp folder and put an HTML virus.
I-Worm.Kevlar	08/16/2001	w32.Pet_tick.M TM : <a href="#">worm.Kevlar.A</a> Panda : Worm.Petik.C	Infect C????????.exe. Scans some email address in the Outlook Address Book and uses MAPI to spread.
<a href="#">I-Worm.Loft</a>	06/23/2001	w32.Pet_Tick.Intd  Sophos : <a href="#">w32/Petik-K</a> AVP : I-Worm.Petik.k  TM : <a href="#">worm.Petik.K</a>	Uses MAPI function to spread. Open some DLL files to uses some API.
I-Worm.MadCow	12/01/2000	w32.Pet_Tick.A@mm w32.Salut.Worm@mm  AVP: <a href="#">I-Worm.Petik.a</a>	It's my first worm. It uses Outlook and mIRC to spread. It creates \SYSTEM\MSLS.ICO and will be the default icon of .exe files.
I-Worm.MaLoTeYa	07/08/2001	<a href="#">w32.Pet_Tick.G</a> w32.Malot.Int  AVP : I-Worm.Petik.f  TM : <a href="#">worm.Malot.A</a>	Uses MAPI to spread. Create a HTML file in the StartUp folder to send some informations about the user. CONTRIBUTE TO 29A#6.

<a href="#">I-Worm.Mustard</a>	05/27/2001	<a href="#">w32.Update.Worm</a> AVP : I-Worm.Petik.d TM : <a href="#">Worm.Mustard.A</a>	Modify "Exclude.dat" in the "Install Folder" of Norton Antivirus to create a VBS file. The worm spread with Outlook which use this VBS file.
<a href="#">I-Worm.Passion</a>	09/08/2001	w95.Pet_Tick.gen	Copy all mail of Outlook Address Book in a file and scans this file to spread. Change some URL 1 times of 10.
<a href="#">I-Worm.Petik</a>	02/07/2001	w95.Pet_Tick.C@mm <a href="#">w95.Buggy.Worm@mm</a> AVP : I-Worm.IEPatch TM : <a href="#">Worm.Petik.A</a>	Modify the wallpaper with a BMP file that it download to a ftp site. He spread with a VBS file which use Outlook.
I-Worm.Rush	02/09/2001	TM : <a href="#">Worm.Rush.A</a>	Not bugz for MAPI functions. Start of propagation by error on August 30 <sup>th</sup> . Some payloads with some titles of windows.
I-Worm.Together	03/15/2002	w32.Pet_Tick.AC@mm	Kill some AV. 100% assembler.
<a href="#">I-Worm.Winmine</a>	06/19/2001	<a href="#">w32.Mineup.Worm</a> AVP : I-Worm.Petik McAfee: <a href="#">w32/PetTick@MM</a> Panda : w32/PetTick	Uses Outlook to spread.
<a href="#">I-Worm.WTC</a>	10/11/2001	Sophos : w32/Petik-WTC TM : <a href="#">WORM.PETTICK.Q</a>	A worm against the terrorism. Infect RAR files in the Personal directory.

<a href="#">I-Worm.XFW</a>	08/08/2001	W95.Pet_tick.gen TM : Trojan.Petik.XFW Panda : Worm.Petik.D	Infect WSOCK32.DLL and all DLL files in the SYSTEM directory.
JS.Germinal	06/02/2001	JS.Lamnireg.A Trojan AVP : JS.Germinal TM : JS.Germinal.A	It infects JS file in \WINDOWS, \WINDOWS\Desktop and \WINDOWS\SAMPLES\WSH directories. It uses mIRC to spread.
<a href="#">VB.Brigada.worm</a>	07/03/2002	TM : <a href="#">WORM.CRAZYBOX.A</a>	Coded with alcOpau1 and spread with Macro word, ZIP and Outlook. My last worm.
<a href="#">VB.DocTor.Worm</a>	06/22/2002	<a href="#">w32/w97M.Dotor.worm</a> McAfee : <a href="#">w32/DoTor</a> Panda : <a href="#">w32/Dotor.A</a>	It spread by infecting DOC files
<a href="#">VB.Lili.worm</a>	06/01/2002	<a href="#">w32.Pet_Ticky.B</a> Panda : <a href="#">w32/Petlil.A</a>	A lame worm with a XXX picture
<a href="#">VB.Mars.worm</a>	06/20/2002	<a href="#">w32.Gubed.worm</a> McAfee : <a href="#">w32/Gubed</a> TM : <a href="#">WORM.GUBED.A</a>	This worm spread by scanning the start page of Internet Explorer to find some email. The binary is also stocking into a VBS file in the %Startup% folder.
VB.Visual.worm	05/19/2002	<a href="#">w32.Pet_Ticky.gen</a>	My first worm coded in Visual Basic. Lame worm.
VBS.Cachemire	06/19/2002		A worm which spread in a local network and have a greate power of spreading.

<a href="#">VBS.Delirious</a>	07/03/2001	VBS.Pet_Tick.C@m VBS.Ketip.C@m  AVP : I-Worm.Petik.h	Put his code in NORMAL.DOT
VBS/w97M.Doublet	03/03/2002	VBS.Doublet@mm	This virus infects VBS and DOC files. Spread with Outlook.
VBS/w97M.Xchange	04/27/2002		This worm/virus infects VBS files and DOC documents word. CONTRIBUTE TO RRLF#2
VBS.GoodBye	12/01/2001		UNRELEASED WORM
<a href="#">VBS.Hatred</a>	06/29/2002		Encrypt with my tool "Petik's VBS Hex Convert"
<a href="#">VBS.Judge</a>	12/08/2000	<a href="#">VBS.Pet_Tick.B@mm</a> VBS.Ketip.B@mm	Use ftp to download a file (virus ?, trojan horse ?). If we are the 1st of the month, Judge modifies the AUTOEXEC.BAT.
<a href="#">VBS.Park</a>	06/24/2002		A VBS/HTML multi- infection virus
<a href="#">VBS.Petik</a>	01/31/2001	<a href="#">VBS.Pet_Tick.A@mm</a> <a href="#">VBS.Ketip.A@mm</a>  AVP : I-Worm.LeeBased	It arrives as an HTML email message. It use Outlook and mIRC clients to spread. It infects different files and sends some information from infected computer to 2 email addresses.
<a href="#">VBS.Seven</a>	06/18/2001	<a href="#">VBS.Chism@mm</a> VBS.Copy.A@mm  AVP : I-Worm.Petik.i	Many actions in any day

		TM : <a href="#">VBS.PETIK.I</a>	
VBS.Starmania	06/15/2001	VBS.ManiaStar.A@mm AVP : IRC-Worm.generic.vbs	It infects all VBS files in different folders. It spread with three different subject, body and attachment.
w32.HLLW.Archiver	05/12/2002		Infect ZIP files in certain folders.
<a href="#">w32.HLLW.Last</a>	10/12/2001	Sophos : w32/Stall-A	My very first (and last) worm written with Borland C++.
<a href="#">w32.HLLW.LiteLo</a>	03/10/2002		A lame HLL worm.
w32.HLLW.SingLung	01/27/2002	AVP : <a href="#">I-Worm.Stopin</a>	Open *.ht* file to find some email and spread with MAPI functions.
w32.HLLW.wargames	02/22/2002	AVP : <a href="#">I-Worm.WarGam</a> Viruslist : <a href="#">warGame</a> <a href="#">w32.WarGam.Worm</a>	Differents way of propagation : open *htm files, old mail read and Outlook Address
w32/w97M.Twin	02/01/2002	<a href="#">w97M.Comical</a> Sophos : <a href="#">w97M.Comical</a>	This worm uses VBA and w32asm to spread.
<a href="#">w32/HTML.Dilan</a>	06/26/2002		Spread via HTML files by infecting them in specifics folders.
win32RAR.Linda	02/16/2002		This virus infects RAR files while adding the virus and HTM files while adding a script.

w97M.Apiword	05/14/2002	w97M.Apish	Uses some API to infect word Document
w97M.AutoSpread	05/09/2002	w97M.Beko@mm	A large spreading. Export "Sleep" API
<a href="#">w97M.Blood</a>	06/18/2001	w97M.Pet_Tick.Intd w97M.Ketip.Intd AVP : Embedded	Infect NORMAL.DOT.
<a href="#">w97M.Kodak</a>	06/10/2001	w97M.Adok.A AVP:Macro.Word97.Adok	Infect NORMAL.DOT.
<a href="#">w97M.Maya</a>	06/05/2001	w97M.Outlookworm.Gen AVP : Macro.Office.Melissa-based TM : <a href="#">w97M.AYAM.A</a>	It uses mIRC and Outlook to spread.
w97M.Wolf	02/25/2002	w97M.Droopy.A	Infect .doc files with the "wolf" module. Thanx to Walrus
